

CLAY-2-GO LUBE

Clay-2-Go Lube is the Professional's choice for lubricating surfaces whilst removing surface contamination through the claying process - Clay bar, Clay pad, Clay towel.

Clay-2-Go Lube is a specially formulated lubricant to help prevent surface marring which is caused primarily through drying out issues due to friction.

Clay-2-Go Lube is easy to apply, creates a surface barrier through the claying process, and is easy to wipe down once de-contamination is complete.

Clay-2-Go Lube delivers superior performance to conventional methods i.e. soapy water.

DIRECTIONS:

Apply a liberal amount of product to the face of the clay and to the surface area being treated. This lubes both the surface area being worked and the clay.

Decontaminate surface following clay bar instructions/method for us..

Wipe down with cloth.

Do not apply/use in direct sunlight

Typical Specification:

Composition : Blend of surface active agents with water, preservatives, dye and perfume.

Appearance : slightly viscous liquid

pH : 8.0

Colour : Blue

Perfume : Pleasant

Stability : Protect from freezing. .

Shelf Life : Minimum 2 years in unopened containers.

Packaging : 5L

CODE: 90405
