

INSECT REMOVER

• CAUSTIC FREE •

Fast Removal of Dried-On Insect Remains

Specially Developed: Speciality cleaner for the removal of dried-on insect remains and blood splatter from all vehicle types: trucks, buses, trains, cars etc.

Multi-Surface: Cleans dirt, oil and grease deposits from paintwork, glass, plastic and other types of exterior trim.

Economy: Concentrated formula allowing for dilution if required for additional cost-in-use economies.

Directions for Use:

Car, Truck, Coach & Bus Cleaning

Use as supplied or diluted with up to 3 parts water, depending upon severity of insect spatter/deposits

Apply through low pressure spray, or with a WaltaMitt™ hand cloth using the textured micro fibre face.

For increased foaming action apply with foam lance or 'Tornado' gun.

Allow 1 or 3 minutes dwell time, then rinse off thoroughly with clean water.

Do not allow un-rinsed residues to dry out on surfaces being cleaned as these surfaces may be adversely affected.

CAUTION: Some alloys and plastics are sensitive to alkali materials. If in doubt check before use.

Train Cleaning: the rinsed cleaner residues can be allowed to drain directly onto the track bed. A pH of 11.00 (or less in use) amounts to 0.001 grams/litre of hydroxyl ion or 0.00021% of sodium hydroxide. This will rapidly convert to sodium carbonate with atmospheric CO₂. The track ballast also intercepts spilled fuel and lubricants.

Typical Specification:

| | |
|-------------|--|
| Composition | : A complex blend of nonionic and anionic surfactants, solubilizers, preservatives, and water. |
| pH | : 11 when diluted 3:1. Rinsed residues will be in the order of 9 |
| Colour | : Transparent Liquid |
| Odour | : Characteristic |
| Shelf Life | : 3 years minimum in unopened containers. |
| Packaging | : 5l, 25l Plastic containers. |
