

The best there is

There are more and more applications where the floor machine must fulfil two functions literally at the "Flick of a Switch".

HFT1530

The HFT model is fitted with the Hurricane dual motor rated at 1000W/1250W providing optimised power options at the two different operating speeds.

For scrubbing you want 150rpm but for polishing 300rpm will give quicker and better results. This is very much the case in hospitals, care homes, hotels, schools, etc where the needs vary quite substantially each day and two separate machines are not always practical or available.

The design characteristics for the HFT model echo all the many details of the Hurricane range but with the advantage of two speeds where required.

Optional Dustrol vacuum kit

Twinspeed selection

Brush / Pad Selection

Our full range of machines is complemented by an extensive range of brush specifications in order to ensure the highest standards and optimum results in use and floors you will be proud of. (See FloorCare Accessory Catalogue)

Heavy duty scrubbing brush

Union mix polish brush

PadLoc pad drive system

Light duty scrubbing/shampoo brush

Optional 10Kg Weight

Optional Solution Tank

Optional Dustrol Vacuum kit

HFM Specifications

Model	Motor	Deck	Brush	Pad	Power	Speed	Vacuum	Range	Weight	Dimensions (HxLxW)

Hurricane

Better FloorCare... by design

Hurricane...

The single disc floor machine is the heart of all hard floor cleaning and maintenance.

HFS1015, HFS1023

The HFS models are the perfect balance between size and speed, with a choice of 150rpm or 230rpm models and a 400mm brush range and 360mm PadLoc pad drives.

The Hurricane motor concept is designed to keep its "Cool" under continuous and arduous operation whilst its seamless power transmission to the floor is via our long-life, oil filled, low load planetary gearbox.

In addition to its superb performance the operating size is such as to make it excellent to use and allowing a 230rpm speed to be selected to provide an "All Rounder" when that is what is needed, to scrub, to polish, to buff or to burnish, the HFS is often the operator's first choice.

Optional Hi-Dust Motor Filter

Large Solution Tank Option

All HFS models incorporate our ATC, Automatic Torque Control, monitoring and balancing operational power input throughout the cleaning cycle.

The next generation of professional FloorCare

HFM1015, HFM1023

The enhanced Hurricane cooling system added to the ATC, (Automatic Torque Control) provides superb performance with a full 450mm brush range together and a 400mm PadLoc pad drive system.

As with the HFS models the HFM450 size is also available in a choice of 150rpm or 230rpm and is suitable for a complete range of floorcare operations.

The 450 ranges can be used with our optional wet solution tank for scrubbing duties, or the Dustrol vacuum accessory kit, allowing vacuuming and polishing simultaneously where applicable.

Planetary gearbox

Transmission of power to the floor is seamless via the long-life oil filled planetary gearbox resulting in superb handling characteristics.

Simple operator control

Optional 10Kg Additional Weight

Optional Spray Clean System

The HFM 1500 series is available in a choice of 4 different speeds, 150rpm, 230rpm, 300rpm and extra HiSpeed 450rpm.

HFM1515, HFM1523, HFM1530, HFM1545

All models are fitted as standard with our generous oversize Hurricane 1500W drive motor allowing for higher speeds and the use of added weight as required.

The long life, low load, oil filled planetary gearbox ensures seamless power transmission to the floor ensuring excellent results.

With the range of speeds available machines can be selected to cover the whole range of floor care maintenance be it scrubbing, polishing, buffing, burnishing or spray cleaning.

A comprehensive range of accessories is available to cover wet applications, carpet shampooing, vacuum polishing and floor sanding.

The full range of specialist brush designs needs to be considered to give the very best results on different floor surfaces
